## Environmental Risk Assessment and Definition of Protection Goals Training workshop 14-18 Nov 2011, Debrezeit

Break-out session 1- Wed 16 Nov 14:00-15:00 h on  
*(all groups same questions)*

*One or more scenario zones + List potential protection goals*

Information available:

# Slides with detailed Explanation on steps 2 and 3 of the stepped approach to define the protection goals for use in Ethiopian registration.

# colour printed maps of traditional and more refined agro-ecological zones of Ethiopia

Group no: .....

### **Question 1:**

*(Discuss by all, but decide later in central discussion by representatives of political level)*

Could you design an outline of the procedure to obtain political support for the decisions made in this workshop concerning (i) number of scenario zones, (ii) the protection goals to be used in the Ethiopian pesticide registration procedure, (iii) their coupling to relevant scenario zone(s) and (iv) their priority setting ?

Consider as well institutions, the individual actors as a planning in your answer.

**Question 2:**

Should the registration of pesticides in Ethiopia be based upon one scenario zone, or should more scenario zones be considered ? If yes, how many and how should they be defined ? What are the criteria to define zones ?

### **Question 3:**

Which environmental protection goals you judge important to consider in the Ethiopia registration procedure ? Consider environmental compartments as well as organisms.

List of environmental protection goals in the EU:

Environmental compartments:

- groundwater (for drinking water)
- soil (persistence)
- surface water (persistence or for drinking water)

Organisms:

- birds and other terrestrial vertebrates
- aquatic organisms
- bees
- non-target terrestrial arthropods
- soil fauna and processes
- sewage treatment micro-organisms
