

Environmental risk

1. Do you agree that PRIMET is suitable tool for env'tal risk assessment or do are there alternative risk assessment schedule?

Yes, we agree that the PRIMET is suitable tool for environmental risk assessment since it is not costly and less data intensive.

Con't

2. What would you like to add to PERMIT for use in Ethiopia?

- *Topography of the country*
- *Crop type*
- *Wildlife*
- *Soli microorganism*
- *Lakes ecosystem*
- *Rivers*
- *Ground water*

Con't

3. How should PERMIT be adopted for Ethiopian circumstances, that is, what is unique for Ethiopia and not for South East Asia?

- *The unique for Ethiopia is the crop system which is dependent for seasonal rain*
- *Types of crops and used technology.*

Con't

4. How do we deal with environmental risk assessment of bio-pesticides?

The specificity of bio-pesticides to the target organism.

Cot't

5. Decide on the appropriate risk assessment methods to analyze the data of the farm surveys?

The PRIMET is better than the GIS because *it is not costly and less data intensive.*

Con't

6. In case the PRIMET is the right chose

- *Topography of the country*
- *Types of crop*
- *Wildlife*
- *Soli microorganism*
- *Lakes ecosystem*
- *Rivers*
- *Ground water*
