

Group six (Training of interviewers )

1. Dr.Tarekegn Birhanu
2. Atakilti Belay
3. Yeraswork Yilma
4. Motuma Alemayehu
5. Zenebe Kibret
6. Melaku Mengistu
7. Melat Yadeta
8. Wondimu Tefera
9. Dr. Dereje Gorfu

# Training of interviewers (1)

According to Work plan of PRRP:

“Train local trainers and trainers will train local interviewers/enumerators.”

For:

Farm surveys (4 regions?)

Survey of capacity building of professionals (11 regions)

Survey of knowledge of pesticide users (11 regions)

## Training of interviewers (2)

Questions for discussion:

- How should the training of interviewers/enumerators be organized?
  - The training need to be 2 stage training program  
TOT → Enumerators → Action

How should the training of interviewers/enumerators be organized?

| Region               | Farm Survey | Capacity Building of professional | Knowledge of Pesticide users | Remark |
|----------------------|-------------|-----------------------------------|------------------------------|--------|
| MoA                  | 4           | 4                                 | 4                            |        |
| Tigray               | 3           | 3                                 | 3                            |        |
| Amhara               | 4           | 4                                 | 4                            |        |
| Oromia               | 6           | 6                                 | 6                            |        |
| SNNPR                | 4           | 4                                 | 4                            |        |
| AA                   |             | 1                                 | 1                            |        |
| DDW                  |             | 1                                 | 1                            |        |
| Harari               |             | 1                                 | 1                            |        |
| Gambella             |             | 2                                 | 2                            |        |
| Somalia              |             | 2                                 | 2                            |        |
| Benshangul and Gumuz |             | 2                                 | 2                            |        |
| Afar                 |             | 2                                 | 2                            |        |

## Questions for discussion:

- ❖ Is it useful to use a 2-step approach, i.e., train trainers first and then let trainers train interviewers?

Yes, 2-step approach would be efficient and effective

- ❖ Can we use the same trainers and interviewers for all 3 surveys?

Yes

- ❖ Who in Ethiopia should be involved in such training on data collection?

Plant protection personnel dealing with pesticides

# Training of interviewers (3)-

Tasks:

- Provide a general outline of the training programmes for each type of survey in terms of:
  - General approach – 2 step approach
  - Parties involved in training –
    - ToT
      - Plant protection personnel dealing with pesticides
  - Parties involved in interviews/enumeration
    - 10 th Grade complete and above
    - Local Residents
    - Women Encouraged

For

Farm surveys

Survey of capacity building of professionals

Survey of knowledge of pesticide users

## Transport

- ToT

  - Land and Air

- Enumerators training

  - Land Transport

- Enumeration Task

  - Land and other transport should be paid in cash

For:

Farm surveys

Survey of capacity building of professionals

Survey of knowledge of pesticide users
